

All children will be inspired. Curiosity of the world around them is sustained beyond the classroom, and through memorable experiences, children acquire a range of skills that can be applied to other areas of their learning and life.

Children are confident and engaged through curiosity

Learning involves good questioning from children and teachers

Children are challenged through practical investigation, observing, playing and researching

Children work collaboratively and discuss ideas using scientific vocabulary

Learning is enriched by science professionals and children make links with their own lives

Science teaching and learning in our school is good when...
